INNOVATIONS

ICT tool for connecting people (ICT platform)

Matchmaking and interactions (Field visit)

→ FEEDBACK on interest and PROPOSAL FOR TESTING

Training courses (enterprise creation)

→ to the market

Testing in real life settings (Field trials)

→ INNOVATIONS and PATENTS

Connecting with people and market (Brokerage Events) → Dissemination of Innovations

20 field visits with stakeholders

Matching innovation **NEEDS** and innovation **OFFER** engaging end-users

Sardinia (R.Lai)

Tuscany (R.Lai)

Lebanon (P.Moubarak)

Jordan (S. Ayoub)

Field trials with farmers

Running user-driven Open Innovation pilots in 'Real life setting'

- Cover crops field trials (broadbean, peas, chickpea and vetch) in olive groves,
 Jordan
- Green manure in olive groves, Lebanon
- Innovative seed mixtures, Italy

Restoration of 2 hectares of forest woodland in Northern Jordan Planting local seedlings - oak, quercus, carob, rhus, artemisia, wild almond - for pastoral grazing

Catalogues of agroforestry innovations

Presented during 10 B2B cross-border events involving farmers, agronomists, marketers, managers, exporters, researchers, and others involved with agri-food products and agroforestry

ICT agroforestry platform

https://www.livingagrolab.eu/

- E-learning modules on agroforestry in 3 languages
- Pre-competitive analysis tool for promising agroforestry innovations
- Assistance from experts
