

Feed 1 - 2026

*Climate Change & Food Security.
Close up on local solutions.*

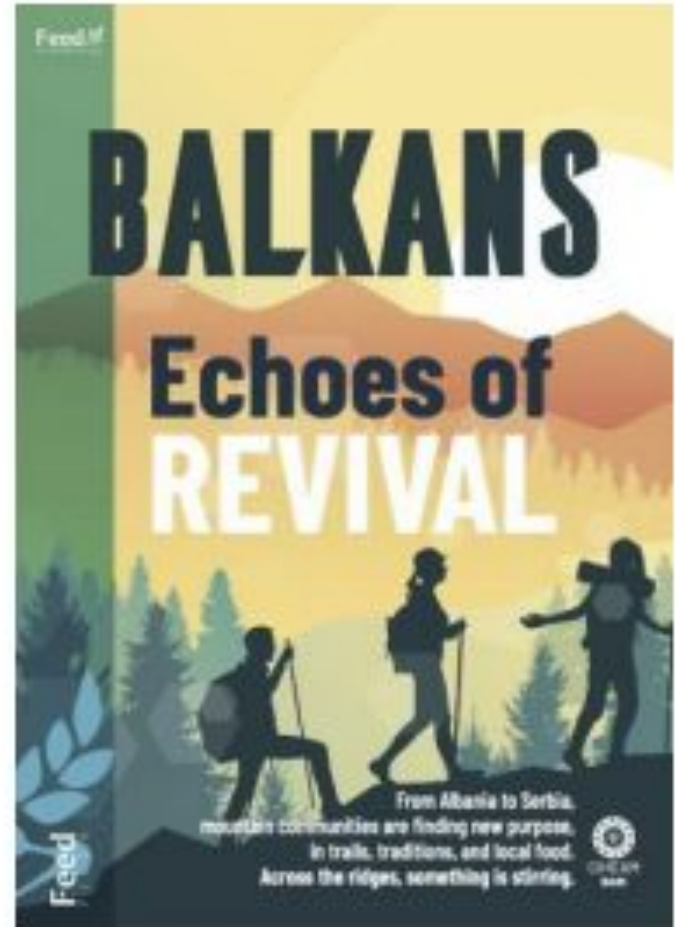

Resilience to climate change is already taking root. By exploring grassroots practices, we can uncover the keys to navigating the most pressing challenge of our era.

Feed 2 - 2026

Balkans: Echoes of Revival

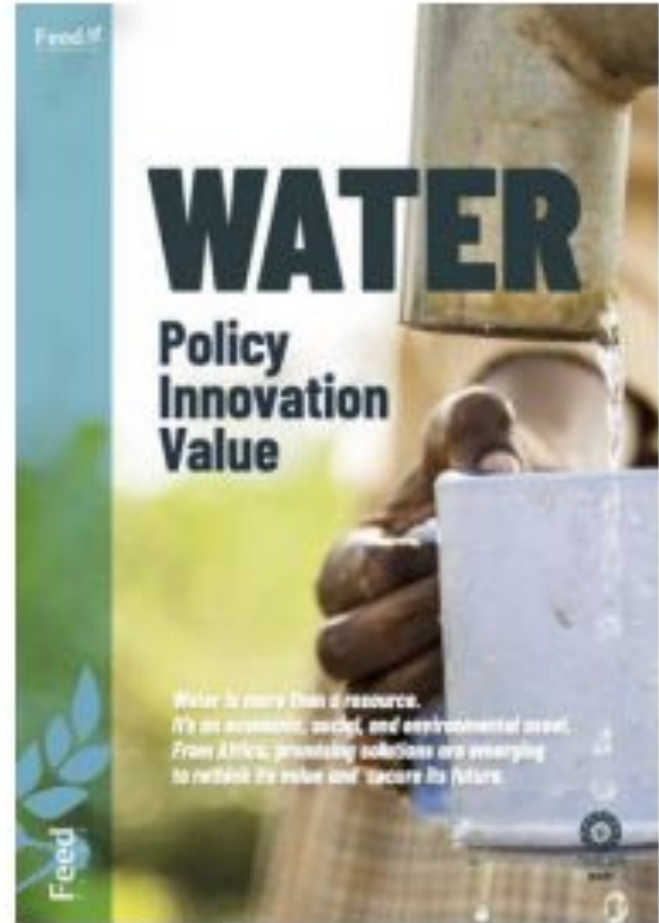

From Albania to Serbia, Balkan countries are engaged in a multi-speed race toward Europe. In this process of modernization, the mountains must not be left behind. Within these highlands lies a wealth of natural resources and traditional knowledge.

Feed 3 - 2026

Water. Policy, Innovation, Value

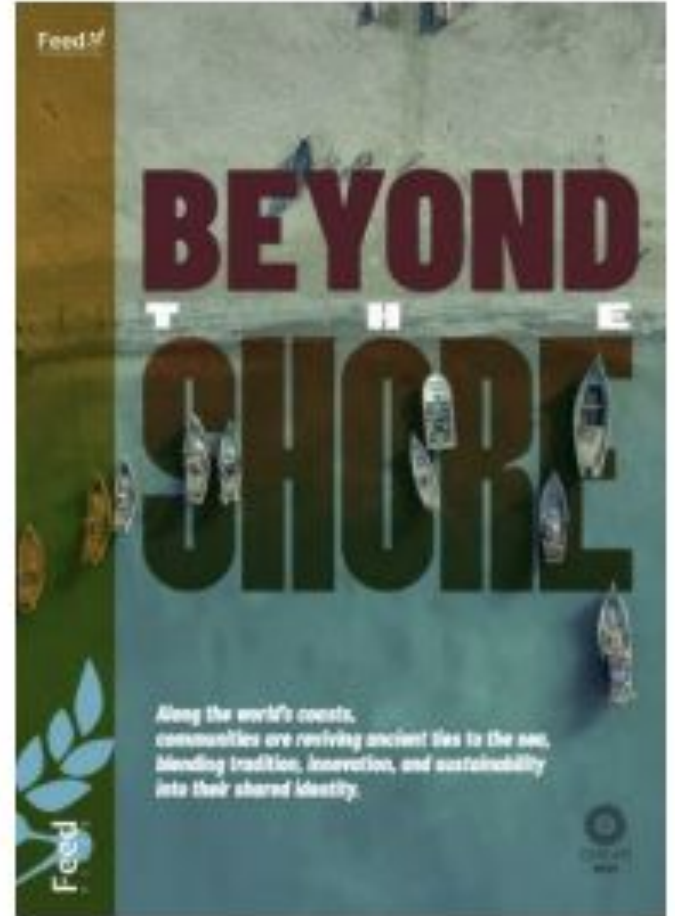

Water is more than a resource - it's an economic, social and environmental asset. From Africa, promising solutions are emerging to rethink its value and secure its future.

Feed 4 - 2026

Beyond the Shore

Along the world's coasts, communities are reviving ancient ties to the sea, blending tradition, innovation, and sustainability into their shared identity.
